

# Microwave oven with Grill

GE87MC/XEE

### TDS – Triple Distribution System

Ordinary microwave ovens use only one antenna for the waves. Samsung's microwave ovens have three, one in the roof and two on the sides. This will give you a more even heating, faster cooking and more evenly warm food.

### Grill

Samsung grill microwaves combine normal microwave cooking with a heating element, this means they're able to brown food and give it a more attractive appearance and texture.

### Ceramic Enamel interior

The Ceramic Enamel interior protects against scratches, is easy-to-clean and prevents build up of harmful bacteria. Also, the coating does not absorb moisture, odour or flavor so there is no transfer of smell or flavour during the next cooking process. The interior of the microwave oven stays as new for a long time.
